EVENT & PROTOCOL PLATFORM · VERSION 3.0

Platform menu guide. What each page is for.

A page-by-page guide to the dashboard for the 2026 Festival of Nine Lessons and Carols: what each menu item does, what you can do there and who uses it.

Parliament of Ghana · Protocol Directorate

November 2026

CONTENTS

The menu, in order

01 **Executive Overview** 3
The home page: how ready the event is, in one screen.

02 **Guest Directory** 4
The master register of every invited dignitary.

03 **Import Wizard** 5
Add many guests at once from a CSV or Excel file.

04 **Protocol Precedence** 6
The five official ranks that decide honorifics and seating.

05 **Invitation Campaigns** 7
Create, approve and send email invitations, then track each one.

06 **RSVP Dashboard** 8
Who has replied, the expected headcount and who to follow up.

07 **Seating Planner** 9
Allocate forecourt seats by rank and lock the final plan.

08 **Arrival & Attendance** 10
The live check-in screen for event day.

09 **AI Command Centre** 11
Ask questions and draft text; every change needs approval.

10 **Usher Scanner** 12
The phone app for checking guests in at the door.

11 **Super Admin Console** 13
Technical settings for email, SMS, AI and Cloudflare.

The first nine items sit under **Operations** in the sidebar. Usher Scanner and Super Admin Console sit under **Event day & governance**. On a phone or small screen, the same menu opens from the button at the top right. Screenshots show demonstration data.

OPERATIONS · 01

Executive Overview

The home page. It gives leadership a one-screen picture of how ready the event is: how many guests are invited, how many have confirmed, how many seats are assigned and how many people have arrived.

WHAT YOU CAN DO HERE

- See the four headline numbers at a glance: invited, confirmed, seats assigned, checked in.
- Follow the invitation funnel in eight tiles: invited, dispatched, delivered, opened, link clicked, confirmed, seated, checked in.
- Compare each protocol rank: how many guests were invited, confirmed and seated.
- Check the event readiness list (venue, ranks, email template, seating, usher scanner).
- Jump to Invitation Campaigns, the Import Wizard or the AI Command Centre.

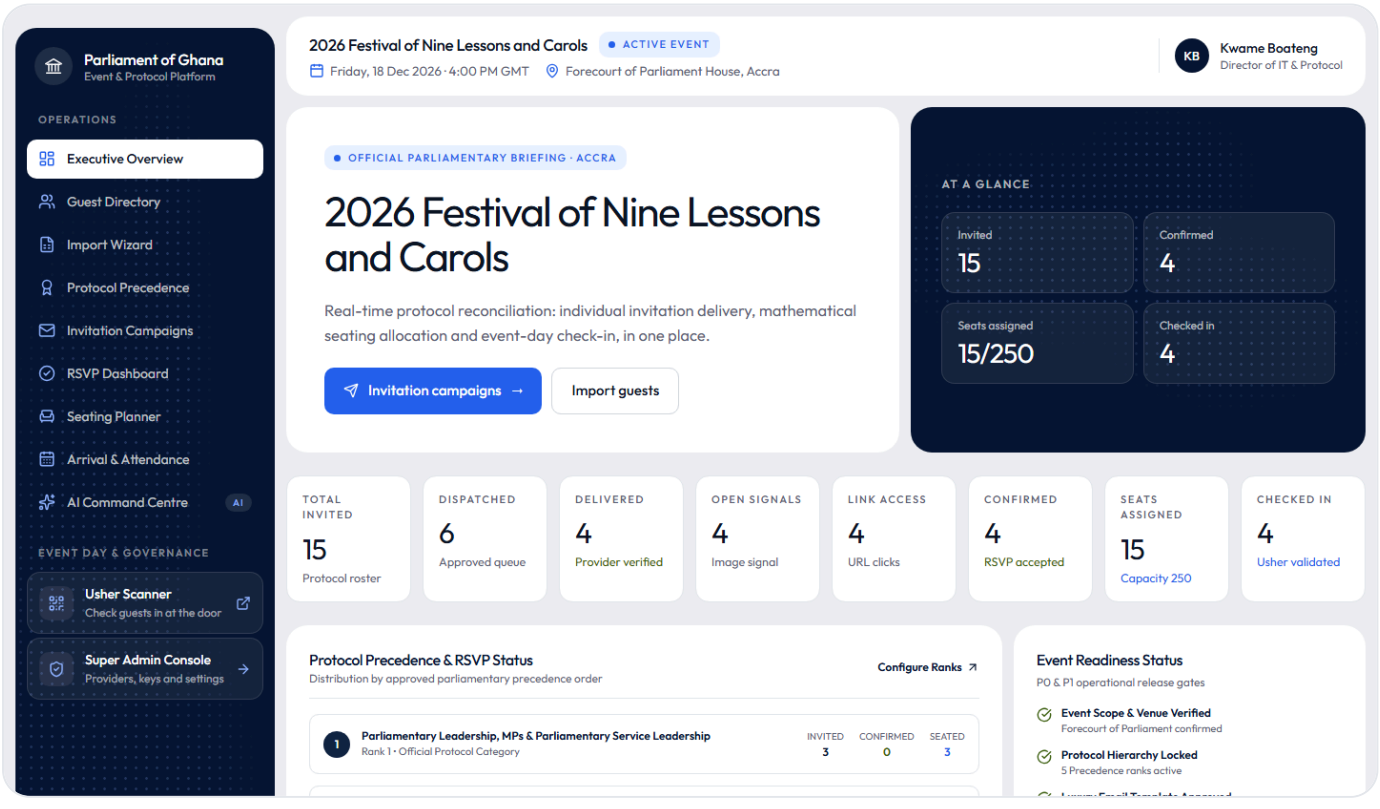

WHO USES IT

Director of Protocol, Clerk's office, event leadership.

WHERE

Sidebar → **Executive Overview**

/

OPERATIONS · 02

Guest Directory

The master register of every invited dignitary. Every other page (invitations, RSVPs, seating, check-in) works from this list.

WHAT YOU CAN DO HERE

- Search guests by name, institution or email.
- Filter by protocol category or by RSVP response.
- See each guest's title, institution, contact details, RSVP status, assigned seat and reference number (GH-GST-…).
- Add a single dignitary by hand, with their protocol category and companion allowance.
- Go to the Import Wizard to add many guests at once.

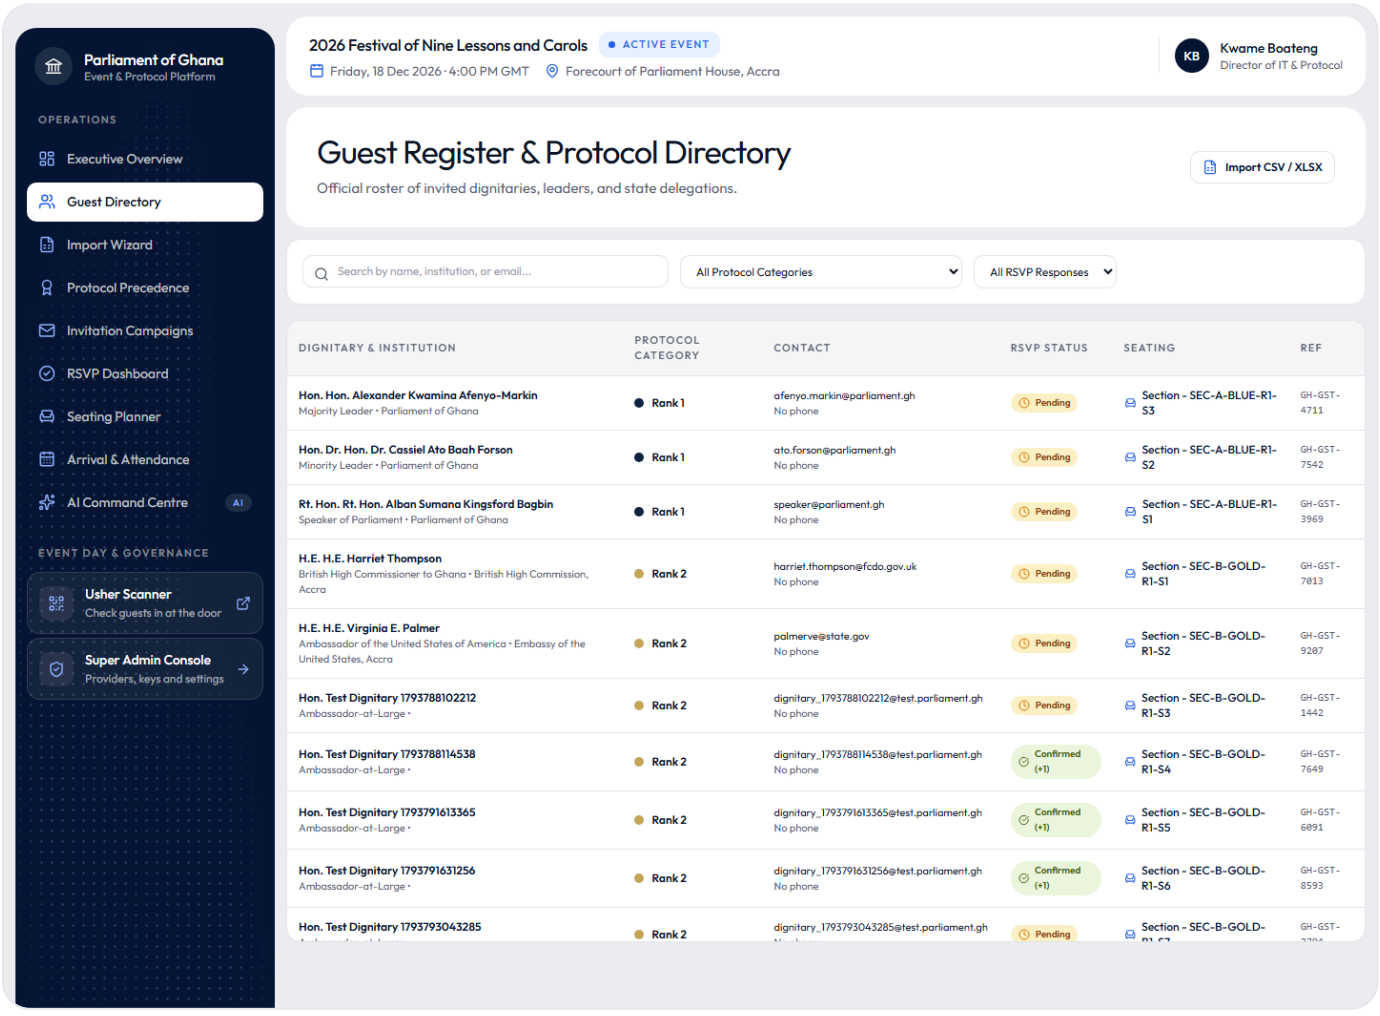

WHO USES IT

Protocol officers who maintain the guest list.

WHERE

Sidebar → **Guest Directory**

`/guests`

OPERATIONS · 03

Import Wizard

Adds many guests at once from a spreadsheet, instead of typing them in one by one. It checks the file before anything is saved.

WHAT YOU CAN DO HERE

- Upload a CSV or Excel (XLSX) file with the columns fullName, title, designation, institution, email and categoryKey.
- Preview every row and see which ones have a problem, such as an invalid email or a guest who is already registered.
- Commit the batch, or cancel and pick another file.
- Load a sample parliamentary delegation to try the wizard without a real file.
- After import, go straight to the Guest Directory or to preparing an invitation campaign.

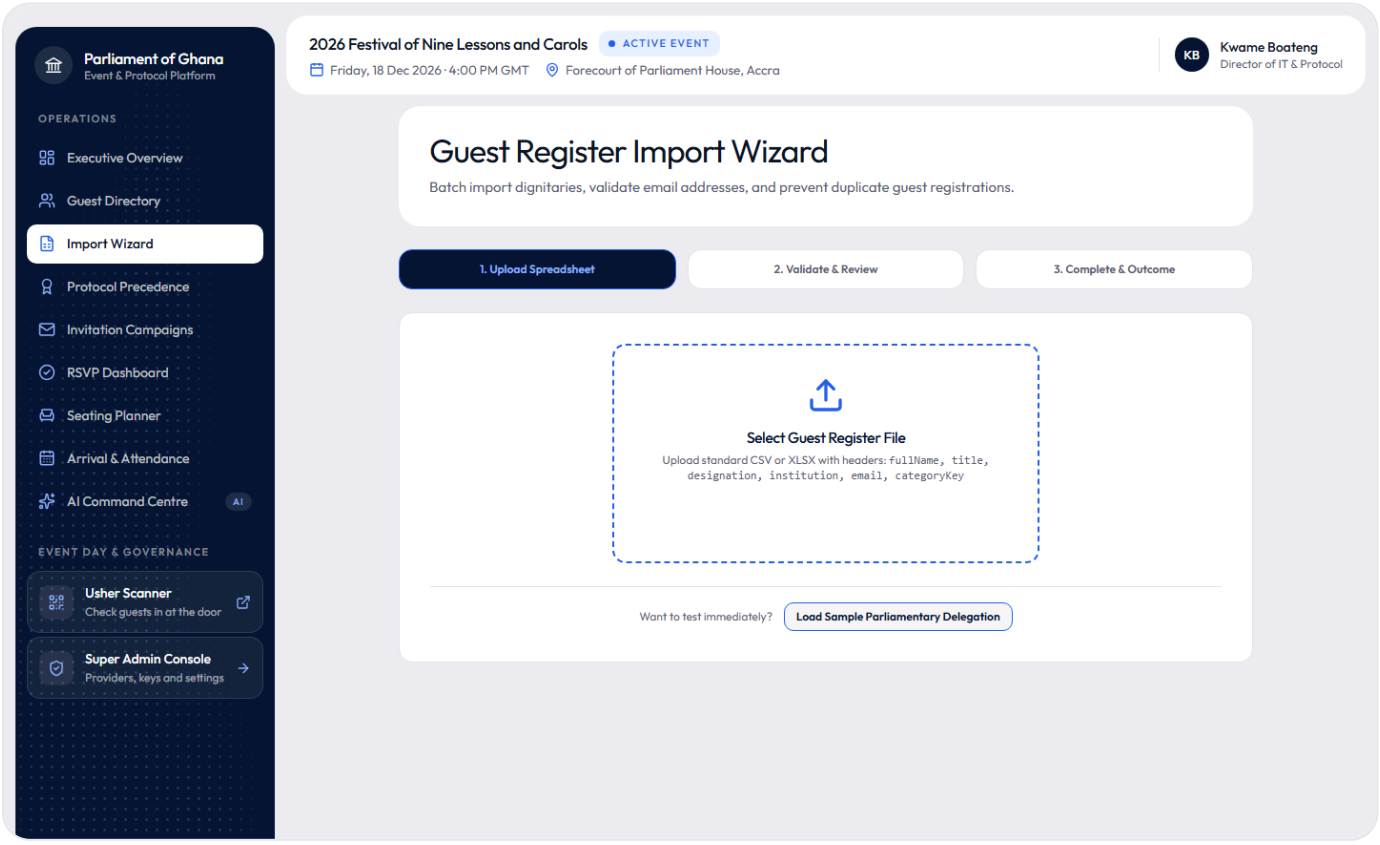

WHO USES IT

Protocol officers receiving guest lists from offices and institutions.

WHERE

Sidebar → **Import Wizard**

`/guests/import`

OPERATIONS · 04

Protocol Precedence

The official order of precedence. Each guest belongs to one rank, and the rank decides their honorifics on invitations and which seating section they may sit in.

WHAT YOU CAN DO HERE

- See the five ranks in order: 1 Parliamentary Leadership, MPs and Parliamentary Service Leadership · 2 Diplomatic Corps and Designated State Dignitaries · 3 Public and State Institutions, Security Services and Judicial Service · 4 Clergy, Churches and Religious Bodies · 5 Civil Society, Private Sector and Other Distinguished Guests.
- See the rules attached to each rank.
- See which registered dignitaries fall under each rank.

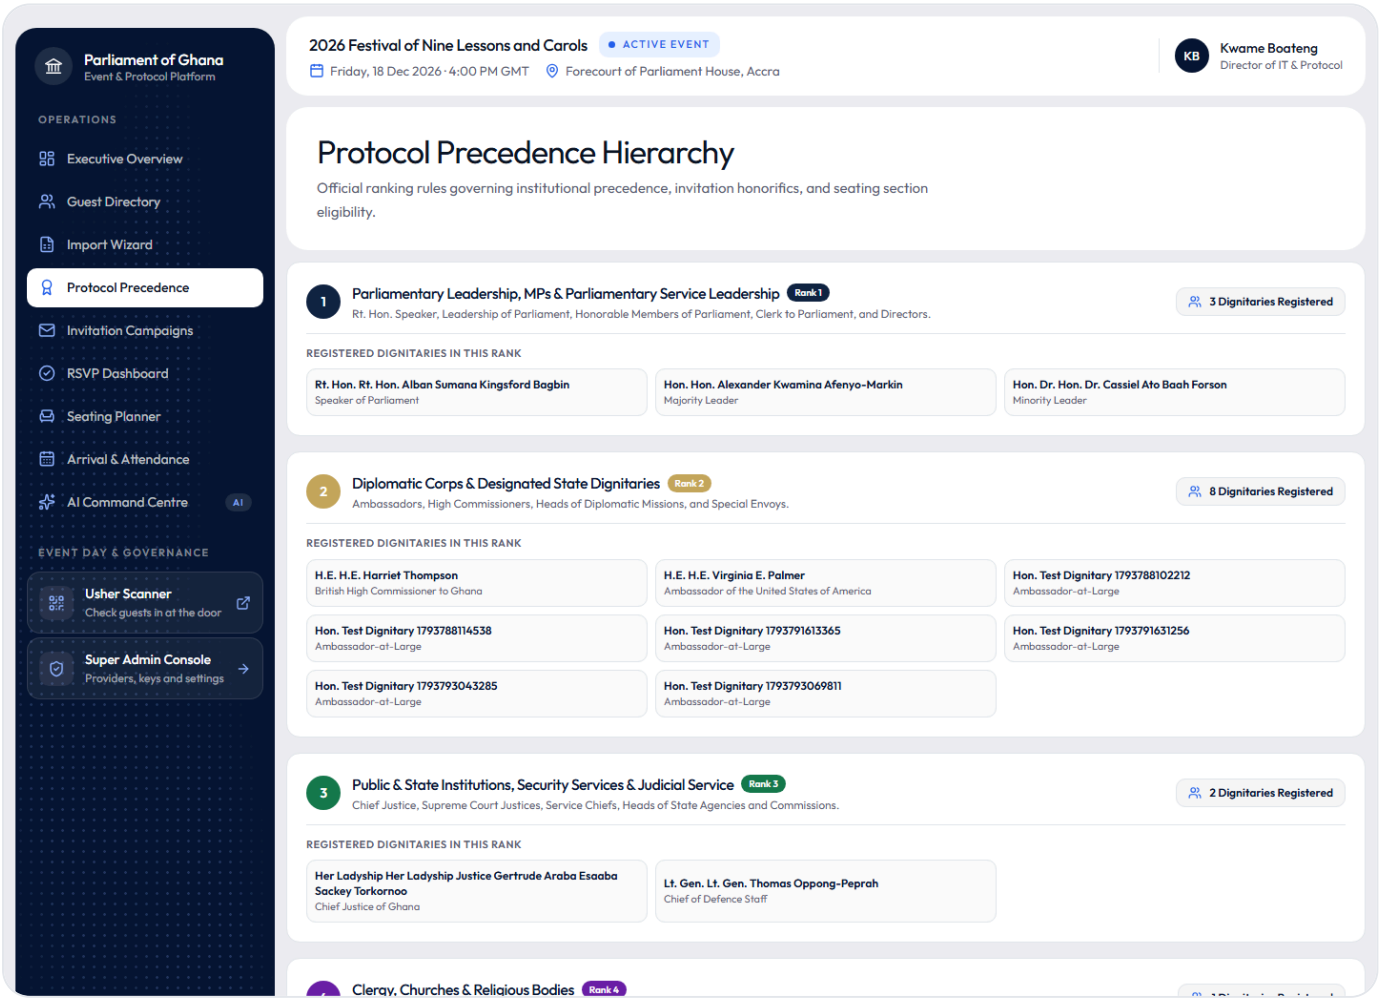

WHO USES IT

Director of Protocol, who signs off the ranking.

WHERE

Sidebar → **Protocol Precedence**

`/protocol`

OPERATIONS · 05

Invitation Campaigns

Sends the official email invitations and tracks what happened to each one. Every campaign needs two people: one creates it, a different person approves it.

WHAT YOU CAN DO HERE

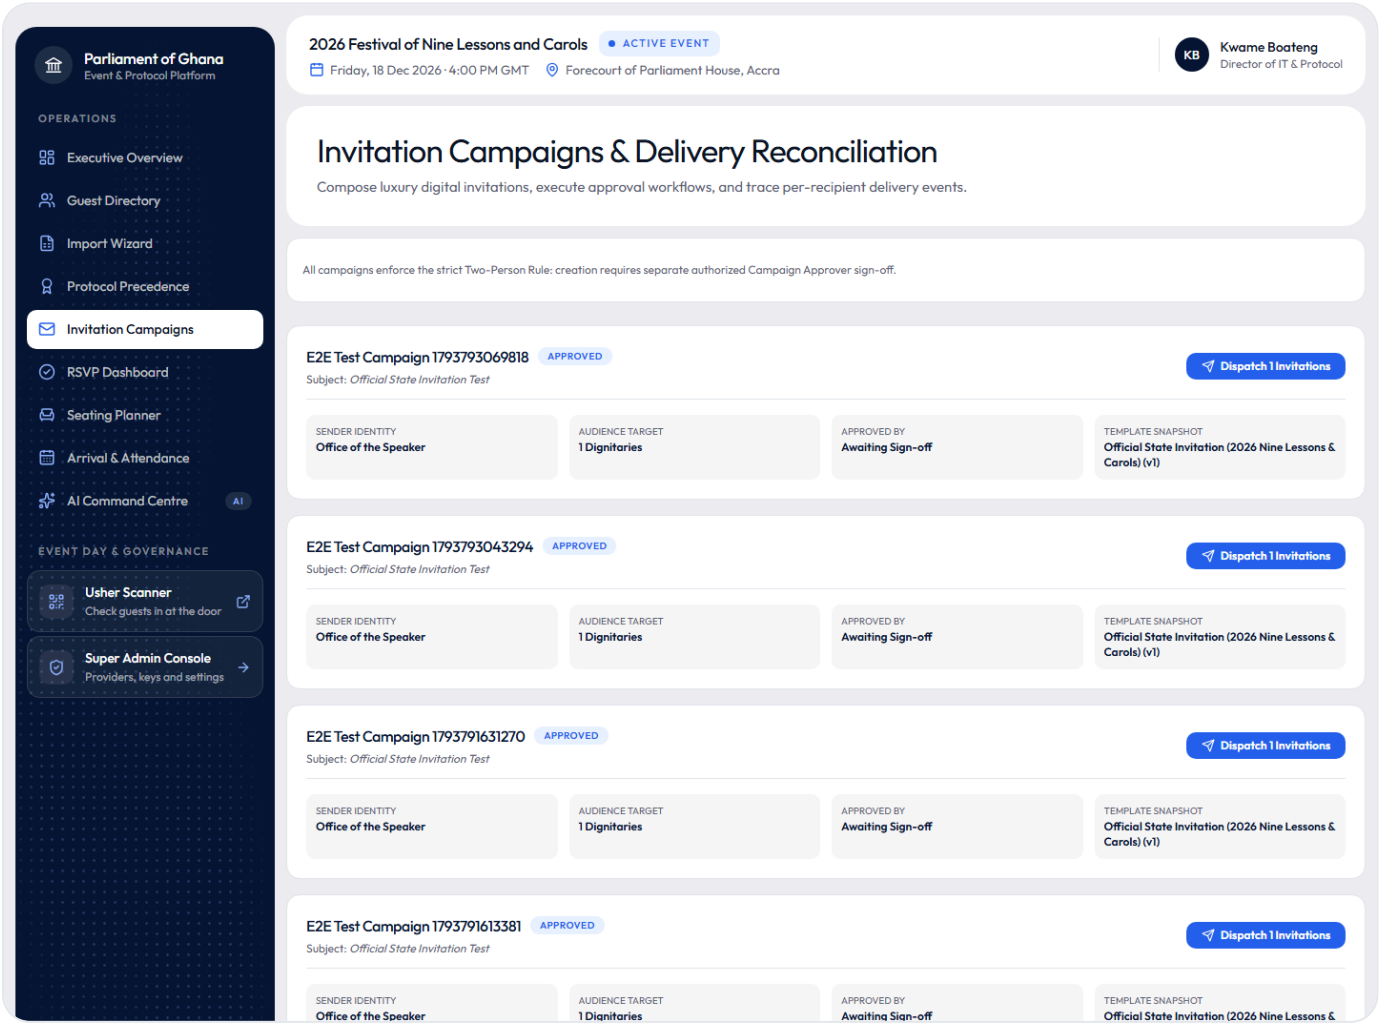

- Create a campaign: title, sender name and email, reply-to address, template, and which ranks receive it.
- Submit it for approval. A separate authorised approver must approve before anything is sent.
- Dispatch the approved invitations.
- Track each recipient: delivered, bounced, opened, link clicked.

WHO USES IT

Protocol officers create campaigns; a senior officer approves them.

WHERE

Sidebar → **Invitation Campaigns**
`/invitations/campaigns`

OPERATIONS · 06

RSVP Dashboard

Shows who has replied to their invitation and who has not, so the team knows the expected headcount and whom to follow up with.

WHAT YOU CAN DO HERE

- See confirmed principals, accompanying persons, total expected headcount and pending follow-ups.
- Read the full register: each guest's rank, institution, response, number of companions, confirmation reference and reply date.
- Spot guests still pending so they can be contacted.

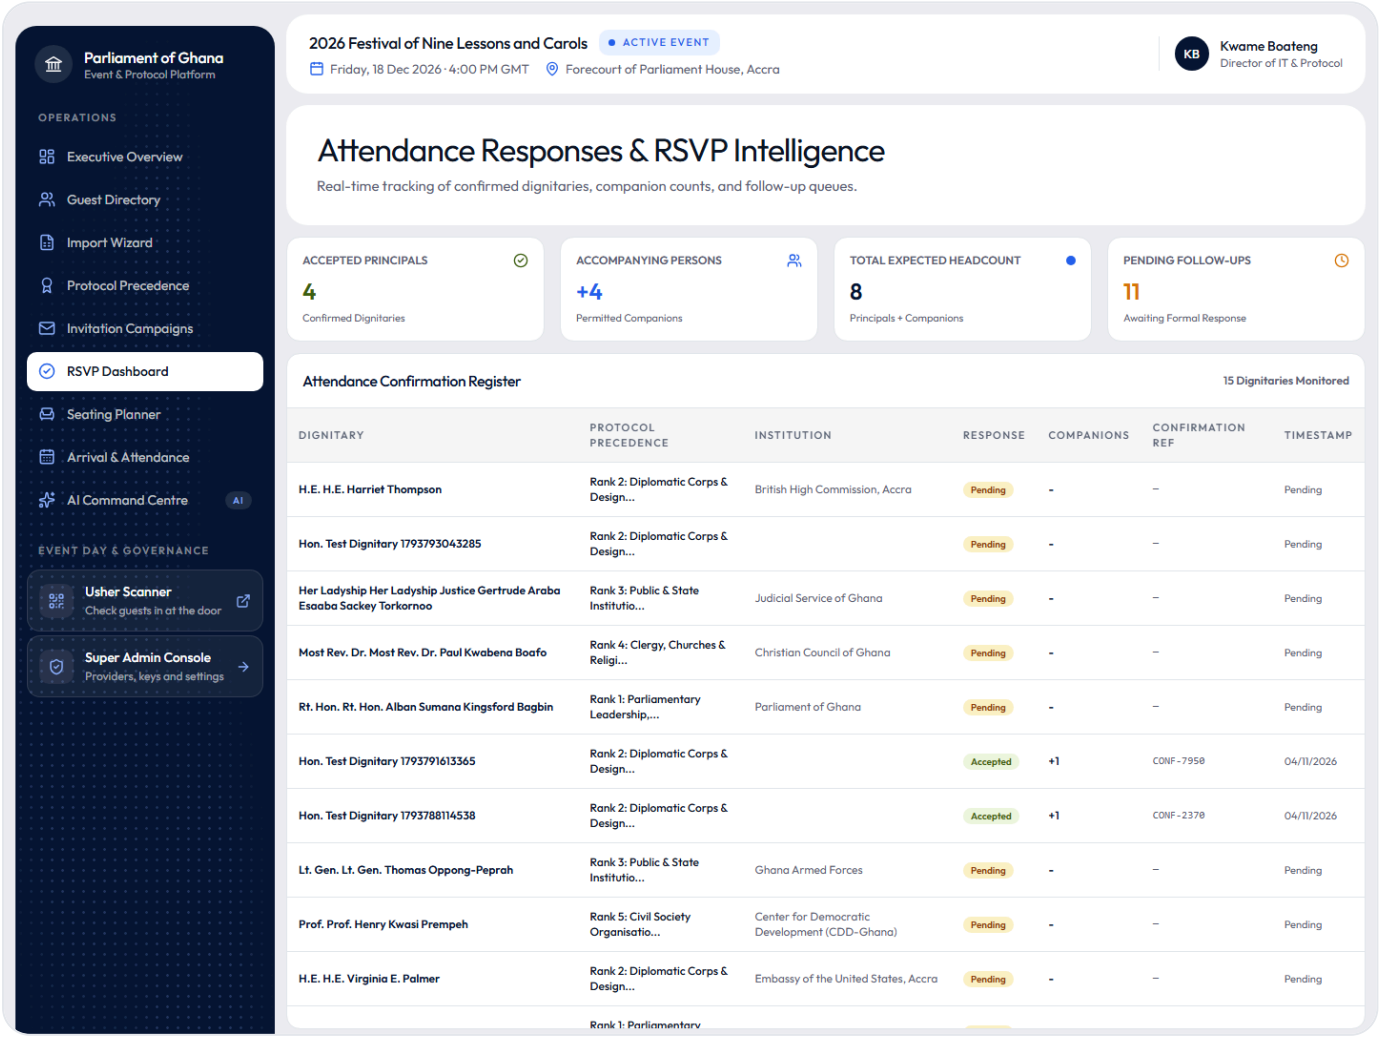

WHO USES IT

Protocol officers chasing replies; leadership checking numbers.

WHERE

Sidebar → **RSVP Dashboard**

`/rsvps`

OPERATIONS · 07

Seating Planner

Plans the forecourt seating by protocol rank. The seating engine places guests automatically and makes sure no seat is booked twice and no section goes over capacity.

WHAT YOU CAN DO HERE

- See the five sections and how full each one is: A Parliamentary Leadership (30) · B Diplomatic Corps (40) · C State & Security (50) · D Clergy (50) · E Civil Society & Invited Guests (80), 250 seats in all.
- Run the seating engine to allocate guests by rank.
- Open a section to see who is seated there and their seat codes.
- Approve and lock the plan once it is final.

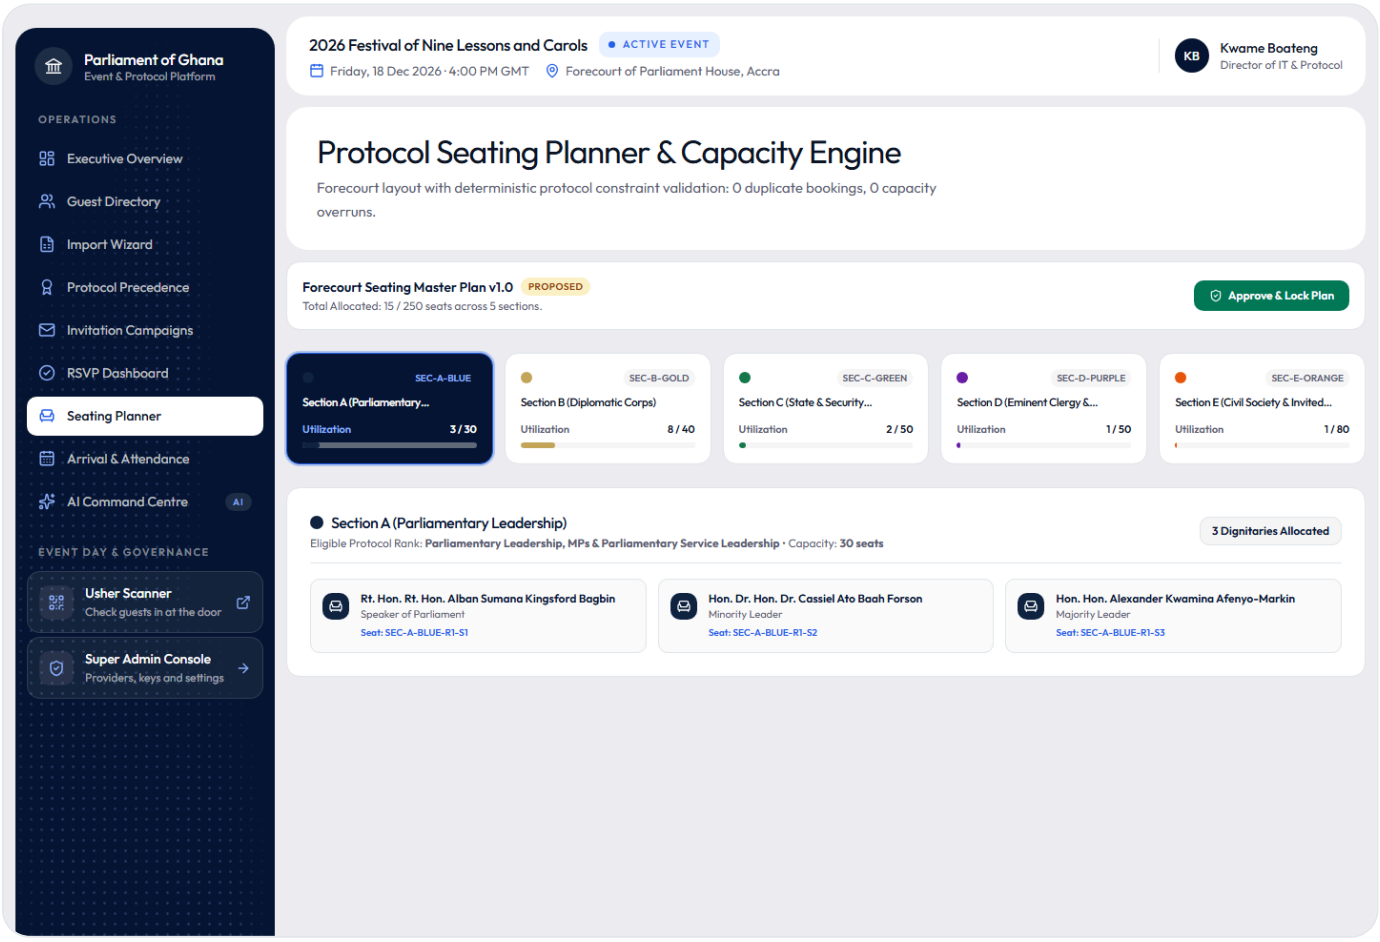

WHO USES IT

Director of Protocol and the seating team.

WHERE

Sidebar → **Seating Planner**

`/seating`

OPERATIONS · 08

Arrival & Attendance

The live control screen on event day. It shows every arrival as ushers check guests in at the door.

WHAT YOU CAN DO HERE

- See how many guests have checked in and how many are still expected.
- Follow the live check-in stream: who arrived, their rank, how they were checked in (QR or manual) and which usher checked them in.
- Watch for problems such as duplicate check-ins or overrides.
- Open the Usher Scanner app.

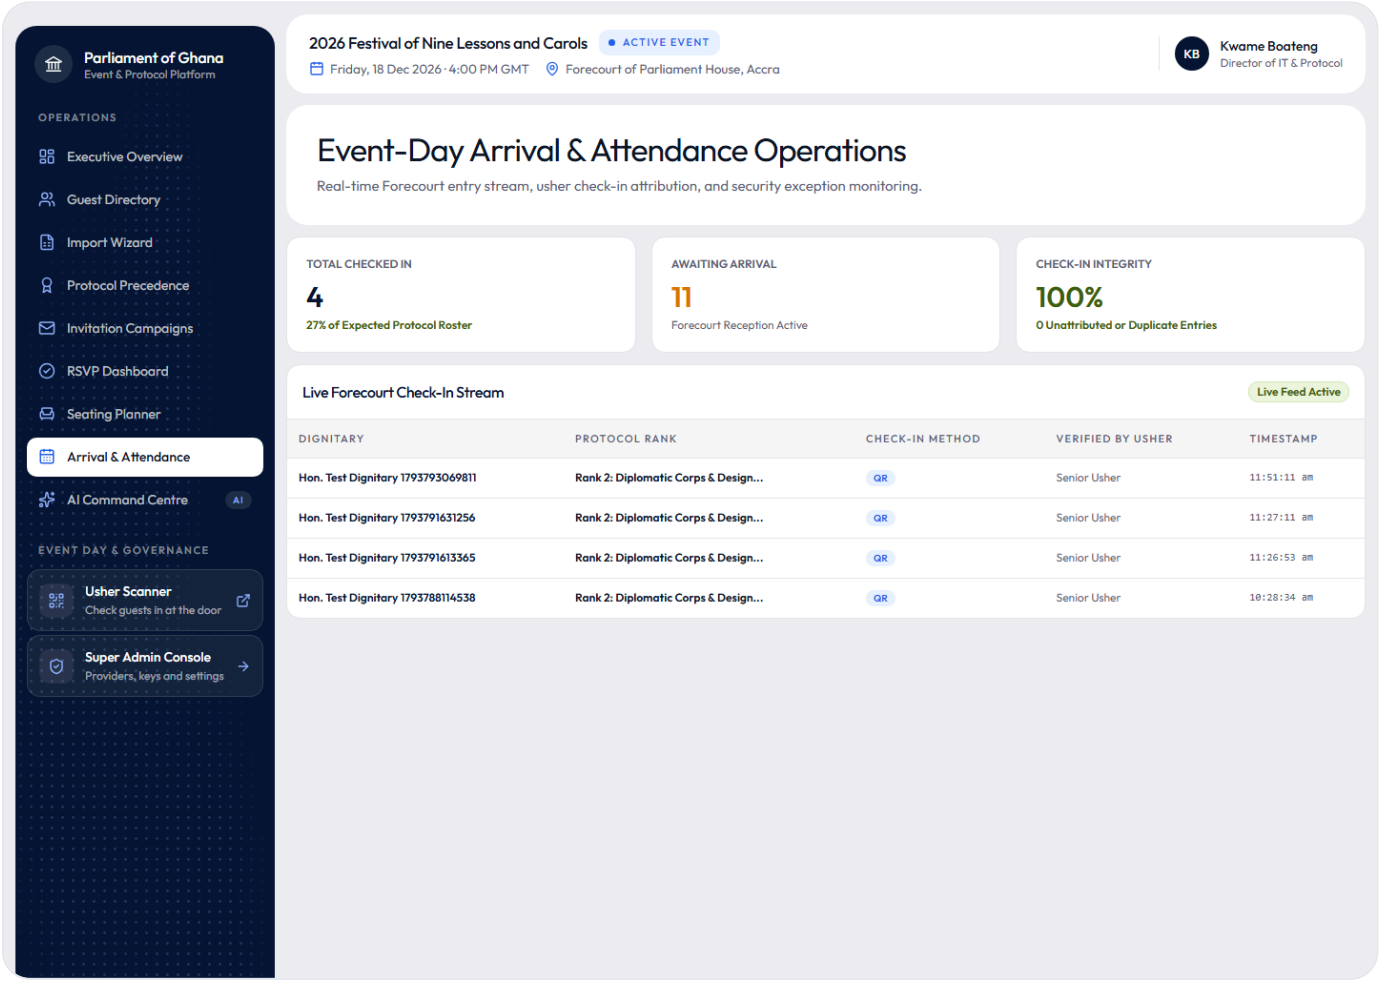

WHO USES IT

Event-day control room and protocol supervisors.

WHERE

Sidebar → **Arrival & Attendance**

`/attendance`

OPERATIONS · 09

AI Command Centre

An assistant that answers questions about the event data and drafts text. It can suggest actions but cannot change anything on its own: a person must approve every change, and each one is logged.

WHAT YOU CAN DO HERE

- Ask questions in plain language, for example: summarise pending RSVPs for the Diplomatic Corps.
- Draft reminder notices, invitation text or an operational report for the Clerk to Parliament.
- Ask for a proposed seating allocation.
- Approve or reject any action it proposes (Approve & Execute Action).
- Limits it cannot cross: no direct database access, no mass sending, no change to ranks without human approval.

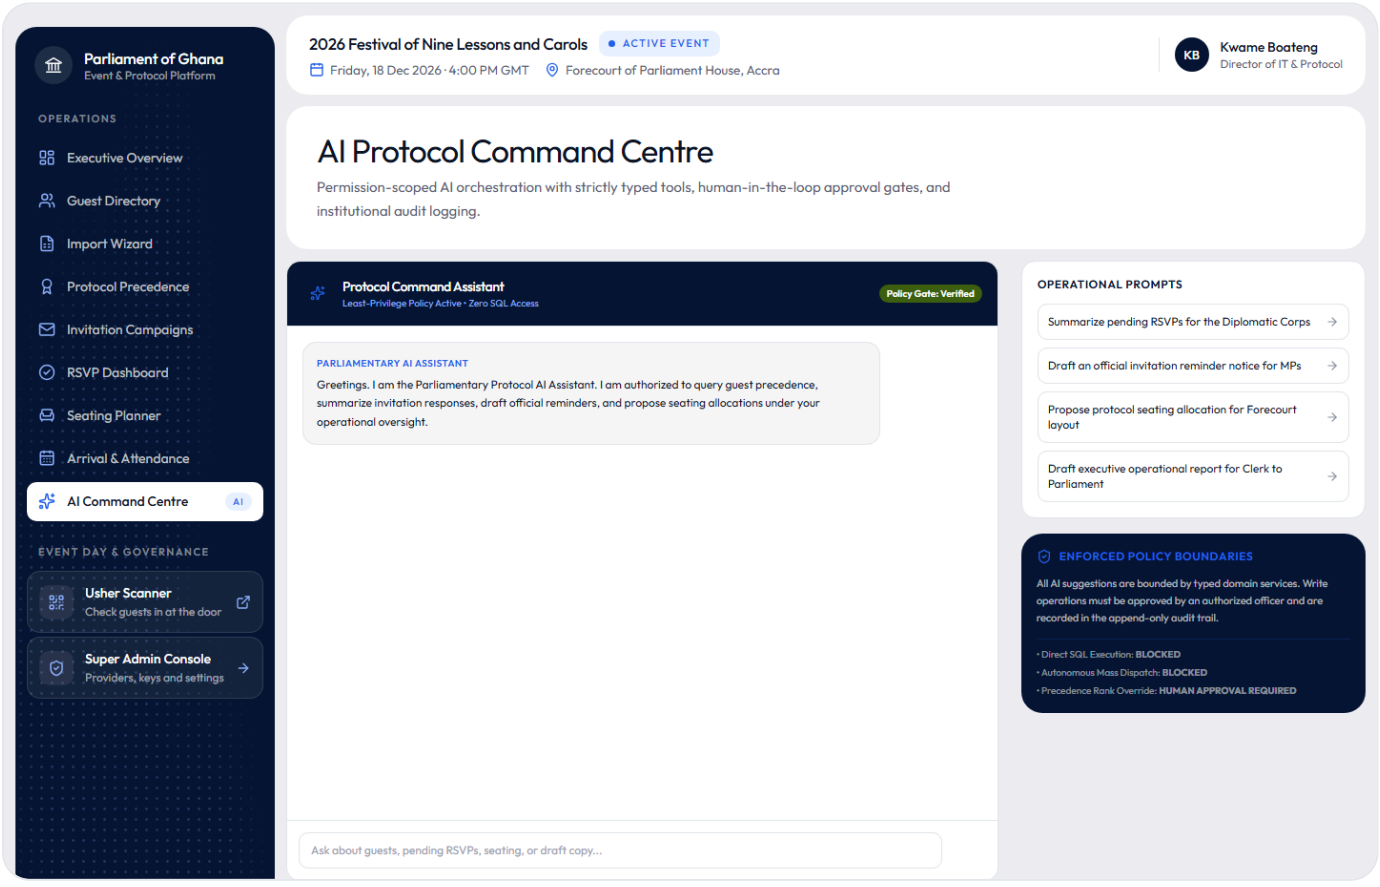

WHO USES IT

Protocol officers and leadership who want quick answers or drafts.

WHERE

Sidebar → **AI Command Centre**

`/ai-centre`

EVENT DAY & GOVERNANCE · 10

Usher Scanner

The phone app ushers use at the entrance. It opens in a new tab and is built for a mobile screen.

WHAT YOU CAN DO HERE

- Scan a guest's QR pass (printed or on their phone) with the camera.
- Or look a guest up by name or GH-GST reference.
- See that the guest is verified and where to direct them.
- Get a warning if the guest has already been checked in.
- Supervisors can override a check-in; a written reason is required and recorded.

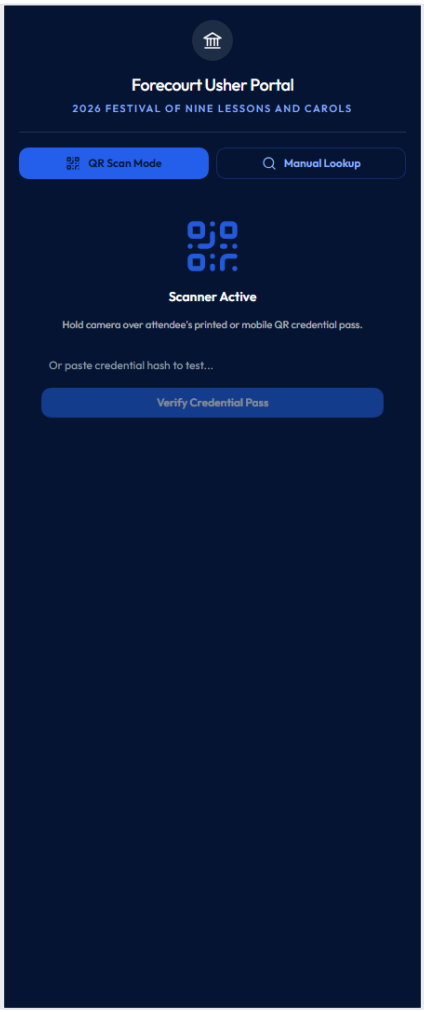

WHO USES IT

Ushers at the door; supervisors for overrides.

WHERE

Sidebar → **Usher Scanner**

`/usher`

EVENT DAY & GOVERNANCE · 11

Super Admin Console

The technical back office, run by DakyXTech. It holds the connections to the outside services the platform depends on. Protocol staff do not normally need it.

WHAT YOU CAN DO HERE

- Manage the keys for OpenAI, Anthropic Claude, Resend (email), Vynfy (SMS) and Cloudflare. Keys are always shown masked.
- Test each connection, edit a key or switch a service off.
- See the log of recent health checks.
- Open the detail pages: AI providers (which AI model handles which job), SMS gateway, Email and Cloudflare & edge.

WHO USES IT

DakyXTech technical administrators only.

WHERE

Sidebar → **Super Admin Console**

`/super-admin`
